

“ME 104 Mechanical Engineering Orientation”

“ME 209 Manufacturing Techniques”

“ME 430 CNC Machines”

“ME 431 Production Systems”

“ME 432 Computer Aided Manufacturing”

“ME 434 Welding Technology”

“ME 435 Manufacturing Planning”

“ME 436 Maintenance Engineering”

Theoretical information within the scope of the courses; students have opportunities to learn in detail by making one-to-one applications on lathes, milling machines, drills and CNC benches accompanied by technicians.

There are 5 lathe, 4 milling, 2 CNC, 2 drill, 1 grinding machines and 1 welding machine in the laboratory.

Apart from these, there are also raw materials and hand tools to be processed for the application projects of the students in the lessons.

(Laboratory assistant in charge Bahar Sayılır – F 171 room)
